SOFTWARE ENGINEER

☎ (+886) 912432415 | ✉ blackhorseya@gmail.com | 🏠 blackhorseya.com | 📱 blackhorseya | 🌐 chengchincheng

Summary

3 years experience specializing in the fullstack development, infrastructure. Enjoys to customize all of the development environment. Interested in devising a better problem-solving method for challenging tasks, and learning new technologies and tools if the need arises.

Skills

Working on Kubernetes, Container, Jenkins, AWS, .NetCore, Kafka, Redis, RDBMS, NoSQL, Helm, OctopusDeploy
Programming C#, Java, React, Go, Shell(Bash)
Languages Mandarin, English

Work Experience

Newtype Games Limited

SITE RELIABILITY ENGINEER

Taipei, Taiwan

Jun. 2020 - Current

•

TrendMicro Inc.

SOFTWARE ENGINEER

Taipei, Taiwan

Oct. 2019 - Mar. 2020

- Design a self-service website that provides rights management (RBAC) and user activity history. Developed using React and .Net Core and deployed to AWS EKS via Helm.
- Design a service that provides device detection and alerting capabilities to enhance SSO security. Use .net core console to develop services and utilize Kafka's pub/sub function to achieve decoupling between systems.
- Design a system to provide records and query user authentication records. Use .net core to develop RESTful API services and deploy and use a combination of graylog, elasticsearch, fluentd to record audit logs.
- Use Jenkins Pipeline and Docker to improve the existing ci process to achieve a clearer display and easier debugging of the ci process.

Above Tech.

SOFTWARE ENGINEER

Taipei, Taiwan

May. 2019 - Sep. 2019

- Develop and maintain a stock market real-time quotation system. Use Java to develop the core system and RESTful API, which will be merged from the source and sent to Redis and NChan for use by other services.
- Develop and maintain a strategy system to analyze and calculate stock market information. Develop business logic using Java and use Clickhouse to efficiently analyze more than one billion documents.
- Develop and maintain ExcelAddIn. Implement Line OAuth2 login to achieve rights management, and use WebSocket and RESTful API to present stock market real-time quotes and strategy results.

President Futures Co. Ltd

SYSTEM ENGINEER

Taipei, Taiwan

Sep. 2016 - Apr. 2019

- Design and implement a bulletin system. Use .Net Core to develop RESTful API and Angular 2 develop background management website, and send messages to clients through RabbitMQ.
- Design and implement a modular futures trading platform based on wpf and prism, providing a trading platform with customized requirements.
- After researching and VCS and CI, use Docker to deploy Gitlab. Import and educate the development team to improve development efficiency.

Education

National Taichung University of Science and Technology

B.S. IN COMPUTER SCIENCE

Taichung, Taiwan

Sep. 2010 - Jun. 2014

Writing

Personal learning record
